To: Drs. Elazar Rabbani & Dean Engelhardt  
From: Ronald C. Fedus  
Date: March 23, 1993  
Re: Enz-2 (C3) [Interferon et al.]

After almost one year after receiving the Filing Receipt for this application, we received the attached Office Action that was issued on March 18, 1993.

In general, the Office Action contained a number of issues which were raised in the previous application. These include:

1. lack of patentable utility (§101) page 2
2. lack of enabling disclosure  
(§112, 1st ¶) pages 2-3
3. indefiniteness (§112, 2nd ¶) pages 3-4
4. anticipation (§102(a) & (f)) pages 5-6
5. obviousness (§103) pages 7-8

At the outset, I would suggest that we confer on the claims which are pending in this application for the purpose of determining their suitability in terms of language and scope.

As far as the issues raised in the Office Action, I think that the indefiniteness issue (§112, 2nd ¶) can be easily handled by minor amendments to the claims. The anticipation rejection by Weissenbach et al. can also be easily handled by a so-called Rule 131 Declaration to swear behind the reference. I have some laboratory notebook pages from Dr. Pravinkumar Sehgal and will probably need some input from the inventor in order to draft and submit a proper declaration. With respect to the anticipation rejection under §102(f), this is an issue which can likewise handled by a declaration in the name of Dr. Sehgal as the sole inventor.

Please let me know as soon as you have had an opportunity to review the Office Action. I would like to schedule an appointment with Dr. Sehgal in the coming weeks so that we can prepare a substantial response to overcome all of the remaining issues.

Re: Enz-2 (C3) [Interferon et al.]

On this date I telephoned Examiner Shelly Cermak [formerly Shelly Guest] of Group 1812 [Tel. 703-308-3154] who had telephoned the day before.

Examiner Cermak was inquiring as to whether we had filed a response to the March 18, 1993 Office Action. I informed her that we were preparing to file a response but that the application became unintentionally abandoned. I also indicated to Examiner Cermak that we were taking immediate steps to revive the application, and would be filing a Petition to Revive as well as an appropriate response sometime next month.

Serial No. 07/869,073 :

Attorney Docket No. ENZ-2(C3) :

ON PETITION

This is a decision on the petition under 37 CFR 1.137(b), filed June 16, 1994, to revive an unintentionally abandoned application.

The petition is granted.

Since this application is being revived for purposes of continuity only and since continuity has been established by this decision reviving the application, the application is again abandoned in favor of the continuing application.

If the continuing application is one filed under 37 CFR 1.60 or 1.62, applicant must file a written notice in the continuing application within ONE MONTH from the mail date of this decision indicating that the present application has been revived for purposes of continuity and, accordingly, that the continuing application complies with the copendency requirements of the rules. The failure to file such a notice may result in the continuing application being inadvertently returned to applicant.

The statement that the "abandonment was unintentional" does not comply with 37 CFR 1.137(b).<sup>1</sup> However, the statement presented will be accepted and construed as meaning that the "delay was unintentional." If this is an incorrect interpretation in view of the new rules, petitioner is required to provide a statement to that effect.

<sup>1</sup> Effective September 20, 1993. See "Changes in Procedures for Revival of Patent Applications and Reinstatement of Patents," published at 1154 Official Gazette 4 (September 14, 1993).
